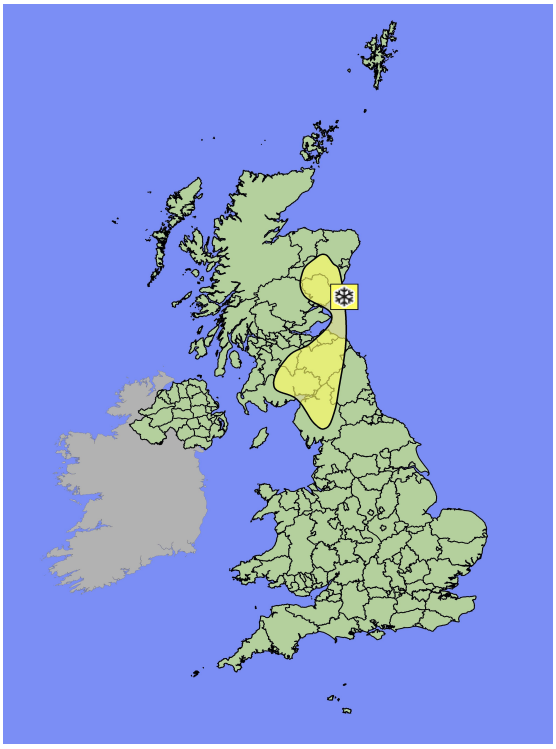
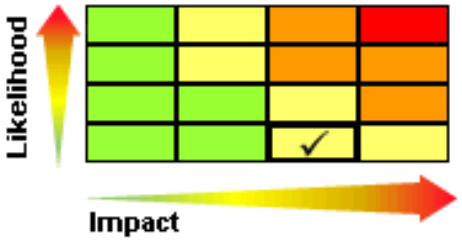
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of rain will become more organised overnight as it moves north-east across parts of northern England, southern and eastern Scotland, where some will turn to snow over higher ground. There is the potential for as much as 5 cm of snow to accumulate on roads above 300-400 metres, with some slushy deposits down to 250 metres in Scotland.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **04:00 on Sun, 04th Mar 2012** until **11:00 on Sun, 04th Mar 2012**

Rain spreading from the south-west early Sunday morning is likely to turn to sleet and snow above around 250 metres, giving accumulations of a few centimetres of snow in places. The public should be aware that this could cause some disruption to travel on routes over higher ground during Sunday morning.
